### THIS IS GEMME!

Gemme takes care of those beautiful gardens you see outside of Mustards. She works very hard every day to make sure that the plants are really happy and healthy, but she never uses any bad chemicals to keep the bugs away.

The type of farming that Gemme does is called 'organic.' Gemme thinks organic farming makes the tastiest veggies, fruits and herbs. Each day she brings the best of the garden to Cindy so that she can create a yummy dish for the special of the day.

Before you leave today, make sure you go visit the garden. And if you see Gemme, ask her to show you around!
